

ARJITH ARYA AMUTHA SARAVANAKUMAR

INCOMING COMPUTER ENGINEERING STUDENT @ HKU

Tokyo, Japan | arjitharya@gmail.com | [GitHub](#) | [LinkedIn](#) | [Website](#)

Incoming Computer Engineering student at the University of Hong Kong with hands-on experience across machine learning, digital logic, and full-stack development. Drawn to the intersection of software and hardware — building systems that sense, decide, and act in the real world.

EDUCATION

The University of Hong Kong **Incoming - Sep 2026**

BEng in Computer Engineering

- Major in Computer Engineering (Focus of Robotics and Autonomous Systems).
- Minor in Informations and Systems Analytics.

UIA International School of Tokyo **Apr 2015 - Jun 2026**

High School Diploma

- Future Leader Scholarship holder for 2 consecutive years.
- High Honor roll student for 3 consecutive years (95% or higher).

EXPERIENCES / PROJECTS

Sysveda Information Technology Pvt Ltd, Tokyo **Jul 2025 - Aug 2025**

AI Programmer Analyst Intern

- Explored core ML models — linear/logistic regression, decision trees, neural networks — to understand pattern detection and decision-making from data.
- Trained models across multiple R&D projects to predict numeric outcomes and generate text-based responses from supervised data.
- Worked with a team using AWS Bedrock to build an agentic AI that transcribes reports.

Humor AI Chatbot (HumorBot) **Feb 2026 - Apr 2026**

Passion Project

- A conversational AI companion that adapts its humor to the user's own style rather than answering questions or fetching info.
- An early prototype for EVA, a larger passion project I'm building: an AI companion specialized in emotional support for elderly care homes.

NAND2TETRIS - Virtual HACK Computer **Mar 2025 - Present**

Self-Paced Coursework

- Building a working virtual computer from first principles — layering NAND gates into adders, registers, and multiplexers until a full architecture emerged.
- Hardware layer completed, currently building the Software layer.

AREA OF EXPERTISE

- **Languages:** Python, JavaScript, Java, Arduino
- **Focus Areas:** Machine Learning, Artificial Intelligence, Digital Logic & Circuits, Computer Architecture, Robotics
- **Tools & Platforms:** AWS, Numpy/Pandas, Docker, Git/GitHub, VS Code, Jupyter
- **Certifications:** Java for complete beginners

ADDITIONAL INFORMATION

- **Languages:** English, Japanese, Hindi, Tamil
